Patriot Software

Powerful, flexible and easy to use

Patriot Software

Patriot is widely recognised as the world's leading monitoring software package

Patriot alarm monitoring software employs cutting edge technology to deliver a versatile, state of the art monitoring package. The combination of features, design and functionality sets Patriot apart from competing products. Monitoring stations world-wide are converting to Patriot.

Patriot combines over fifteen years of monitoring experience with state of the art programming techniques to deliver a unique and proven monitoring system.

With a powerful industry standard MS SQL database engine, Patriot is robust and scalable.

Whether your Central Station monitors 100 clients on a single workstation or more than 500,000 on 50 workstations, Patriot will exceed your expectations. Patriot will track the growth of your monitoring business with a smooth upgrade path from the entry level Lite package through to Professional and Enterprise.

Used in over 50 countries in six languages Patriot software is an internationally recognised product.

The monitoring business is about acquiring and expanding your customer base. Patriot Software lets you offer the services to do just that

Patriot offers the combination of power, flexibility and ease of use that will appeal equally to operators, supervisors and station management. Its modern user interface makes CMS operation intuitive and simple.

Monitoring station profitability will be improved with Patriot's optional modules. These include:

- SMS Text messaging and paging
- Email messaging
- Internet dealer and client access
- Mapping
- IP monitoring
- Video integration & verification
- Accounting interfacing
- Telephony
- Lone worker monitoring

Packed with failsafe features, Patriot helps eliminate costly errors that can seriously damage the reputation of a monitoring business.

Live back-ups and archiving happen automatically without interrupting monitoring services. In the event of server hardware failure, operators can activate a standby server, ensuring continuity and integrity of monitoring.

The list of distinguishing features is impressive. Compatibility with industry standard alarm equipment, flexible open/close management and a wide range of integrated reports are just a few examples of the power of Patriot.

Multi-user or stand alone

Windows Server 2003/2008 XP Pro, Vista Business
/Ultimate, 7 Business /Ultimate

Powerful, state of the art graphical user interface –

Consistent, powerful, flexible, easy to use
